

# MINDFUL MEALS

## LOCK OUT HUNGER WITH CUTTING-EDGE SMART LOCKERS

### BENEFITS TO NEIGHBORS

#### Safety

Lockers are monitored for functionality and temperature and enable contactless delivery.

#### Nutritious Food

Lockers can offer refrigeration, frozen, ambient and even heated options, enabling access to a variety of nutritious foods.

#### Flexibility

Lockers can be placed inside or outside, offering 24/7/365 access to food.

#### Dignity

Households can pick up their chosen food at times and locations that provide a level of confidentiality and anonymity.

### Cracking the Code for Convenience

Many individuals in our community face significant challenges in accessing the food they need. Barriers like limited transportation, pantries with varying hours of operation and the stigma often associated with seeking assistance prevent neighbors from getting the support and proper nutrition they deserve. Through partnerships with local organizations, innovative smart locker systems provide additional food pickup options at locations that many of our neighbors in need are already visiting in their daily lives.

### How Do Smart Lockers Work?

Smart locker systems are fully integrated with the online OrderAhead system. Through a simple sign-up process, each user can customize their order and pick it up from the designated smart locker at any time, at their convenience using a custom secure code.

### Where Can They Be Placed?

Smart locker systems can be installed indoors or outdoors. All you need is a level, concrete foundation to support them.

### How Do They Keep Food Safe?

Smart locker systems provide a temperature-controlled environment, keeping food safe from extreme outdoor climates while eliminating refrigerated storage requirements at partner locations.

### How Many Lockers Are Provided?

Smart locker systems are modular and completely customizable to provide as many lockers as needed. They can also be expanded later by adding more units. Each additional module comes with 8 more lockers.

### How Much Do They Cost?

To further explore options and secure resources for your smart locker system, schedule a time to connect with a Feeding America Eastern Wisconsin Development Professional today, and together we will solve hunger!
